**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Connell et al in view of Bauerlein '007 and Cover, newly cited. O'Connell et al discloses the claimed invention except for the first and second pulleys, and the claimed sensing lever. Bauerlein '007 teaches a belt-type ice maker having first and second pulleys 12 and 13 supporting the belt. It would be obvious to provide O'Connell et al with first and second pulleys for supporting the belt 46, in view of Bauerlein '007, for the purpose of providing a more stable support for the belt. Cover teaches an ice maker having a sensing lever 14 having a first end 20 which is moved upward by a predetermined amount of ice in the storage tray, and a second end 18 which is moved towards the switch 16. It would be obvious to substitute, for the sensing lever 135 of O'Connell, a sensing lever of the type taught in Cover, for the purpose of providing a more compact sensing arrangement.

3. Applicant's arguments with respect to claim 2 have been considered but are moot in view of the new ground(s) of rejection.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
